Jitendra Singh Shekhawat

AI & Data Science Undergraduate | Machine Learning | LLMs & Agentic AI | Retrieval-Augmented Generation

Surat, Gujarat, India +91 7874317017 | jitendra33195@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI & Data Science undergraduate (B.E. Expected 2028) focused on building end-to-end AI applications using Large Language Models, Retrieval-Augmented Generation (RAG), Agentic AI, and applied Machine Learning. Experienced in developing production-style solutions across video intelligence, interview simulation, multi-agent research automation, predictive analytics, and computer vision. Comfortable across the full stack of a modern GenAI project — from vector search and prompt engineering to deployment — using LangChain, LangGraph, FAISS, Google Gemini, Mistral AI, and TensorFlow, with hands-on experience building full-stack AI systems from research to deployment.

TECHNICAL SKILLS

Languages:	Python, SQL, Java, C++
AI & Machine Learning:	Scikit-Learn, TensorFlow, Machine Learning, Deep Learning, Convolutional Neural Networks, Feature Engineering, Model Evaluation
Generative AI:	LLMs, Agentic AI, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Embeddings, Google Gemini, OpenAI, Mistral AI
Data Science:	NumPy, Pandas, Matplotlib, Seaborn
Backend:	FastAPI, REST APIs
Tools:	Git, GitHub, Streamlit
Databases:	MySQL, SQLite, Chroma DB, FAISS

PROJECTS

YouChat – AI Video Intelligence Assistant

Python · Streamlit · LangChain · FAISS · Gemini

- Enabled grounded, hallucination-resistant video Q&A by building a Retrieval-Augmented Generation (RAG) application that lets users chat with YouTube videos, answering exclusively from video transcripts via semantic vector search.
- Implemented the full pipeline — transcript extraction, embedding generation, and FAISS indexing — to power Gemini-driven, context-aware responses with minimized hallucination through grounded retrieval.

Interview AI Coach – AI Interview Preparation Platform

Python · Streamlit · LangChain · Mistral AI · Sarvam AI

- Improved interview readiness by building an AI-powered mock interview platform that analyzes a candidate's resume and target job description to generate adaptive, personalized technical questions.
- Enhanced candidate preparation through integrated speech-to-text and text-to-speech, ATS resume scoring, AI-driven answer evaluation, a personalized learning roadmap, and downloadable interview reports.

ResearchOS – Multi-Agent Research Platform

LangGraph · OpenAI · Tavily · BeautifulSoup

- Designing a multi-agent research system that orchestrates specialized agents for web search, content extraction, synthesis, and structured report generation using LangGraph concepts, reducing manual research turnaround time.

CustomerIQ – Customer Churn Prediction

TensorFlow · ANN · Streamlit

- Engineered features from customer usage and demographic data and trained an Artificial Neural Network to predict churn risk with strong classification performance.
- Deployed the model with Streamlit for real-time churn risk scoring in an interactive dashboard, enabling faster retention decisions.

Brain Tumor Detection (CNN)

TensorFlow · Convolutional Neural Network

- Developed a brain cancer detection system using CNN and TensorFlow/Keras to classify brain MRI images with high accuracy.
- Enabled real-time predictions through an interactive Streamlit web application, improving accessibility of the diagnostic tool.

EDUCATION

B.E. in Artificial Intelligence & Data Science — Government Engineering College, Rajkot — Expected 2028

AREAS OF INTEREST

Agentic AI & Multi-Agent Systems · Retrieval-Augmented Generation · LLM Application Engineering · Applied Deep Learning · Vector Search & Embeddings · AI Product Deployment
